

■ Siva's Complete DSA + Full Stack Development Roadmap

Overview: Two-track roadmap focusing on DSA mastery and Full Stack Development with a target to land internships at top tech companies after 2nd year.

■■ TRACK 1: DSA (Core for Internships)

Goal: Achieve LeetCode rating of 1500+ and problem-solving confidence by the end of 2nd year.

■ Time Allocation: 3–4 hours/day (Mon–Sat)

3-Month DSA Focus:

- Month 1 (Oct–Nov): Arrays, Strings, Linked List, Stack, Queue, Recursion → Build problem-solving rhythm.
- Month 2 (Nov–Dec): Binary Search, Trees, BST, Sliding Window, Two Pointers → Improve logic & start contests.
- Month 3 (Dec–Jan): Graphs, DP, Bit Manipulation → Advance problem solving & contest readiness.

Weekly Routine: Revise on Sundays and participate in 1 LeetCode/Codeforces contest.

■ TRACK 2: Full Stack Development (Industry Prep)

Goal: Build backend mastery, deploy real-world apps, and complete a capstone project.

- MongoDB (revision) + Mongoose – 1 week
- Authentication & Authorization (JWT, bcrypt) – 1 week
- RBAC (Role-Based Access Control) – 4–5 days
- Redis Caching – 4 days
- AWS (S3 + EC2 basics) – 1 week
- Security (Helmet, rate-limit, XSS) – 4 days
- Payment Gateway (Stripe/Razorpay) – 4 days
- Docker (containerize app) – 5 days
- Capstone Project – 3–4 weeks

Capstone Project Ideas: Campus Connect Portal, Taskify, E-Learning Platform, DevHire

■ TRACK 3: Internship Preparation Roadmap

- DSA: 500+ problems solved
- Full Stack: 2 major projects (1 capstone deployed)
- LeetCode rating: 1600+
- Strong GitHub + LinkedIn presence
- System Design basics learned

■ Daily Routine (Example):

- 6:30–7:00 AM: Fresh up / journaling / light exercise

- 7:00–9:00 AM: DSA (2 problems + notes)
- College Time
- 6:00–8:00 PM: Full-Stack (course + practice)
- 8:00–9:00 PM: DSA revision / contest / project
- 9:00 PM onward: Relax / dinner / next day prep

■ Pro Tips for Efficiency:

- Focus on one DSA topic and one full-stack module at a time.
- Track daily progress using Notion or Google Sheets.
- Avoid passive video watching — code while learning.
- Sleep 7 hours/day for better retention.
- Take 1 rest day every 3 weeks for reflection and revision.

■ *Stay consistent, Siva. You're not behind — you're rebuilding stronger.*
